01 OVERVIEW

AT THE CORE OF INNOVATION

Pacific Center is located in Sorrento Mesa, San Diego's leading innovation district. As one of the city's few life sciences campuses with a curated amenity program, the Class-A complex is purpose-built to enhance the tenant experience and meet the industry's evolving needs.

With sustainable design, intentional placemaking, and world-class facilities, Pacific Center will catalyze discoveries and lead to a healthier future for all.

PURPOSE-BUILT FOR POSITIVE IMPACT

Pacific Center comprises two separate campuses – South and North. Construction for Phase 1 of Pacific Center South has been completed, including two lab buildings, an amenity center, and a parking structure. The South campus is designed with four separate ingress and egress options.

OVERVIEW

WHERE NEW VISIONS THRIVE

To support biotechnology and life sciences innovation, Pacific Center combines lab and research spaces with creative office amenities. An outdoor courtyard between buildings creates a nucleus of community, collaboration, and activity.

PROJECT TEAM

A BOLD VISION FOR LIFE SCIENCES

For more than 30 years, Sterling Bay has developed properties that transform communities. We have the vision to see potential where others can't—just like you. Our life sciences expertise and passion for pushing boundaries combine into real impact. With several customized lab space projects, Sterling Bay Life Sciences serves both premier and emerging markets around the country.

- › Top 5 largest Life Sciences owner in San Diego
- › Over 12.7MM SF in development experience across office/life sciences/medical/residential/industrial/hospitality
- › Collaborating with top architects and consultants
- › Multibillion dollar development/redevelopment pipeline
